

Influenza activity continued to decline in King County during week 5 (week ending 02/07/2015). Positive specimens from outpatient surveillance and from reporting hospital laboratories have been identified as influenza A, with a small number of influenza B infections also detected. Among specimens submitted to King County Public Health Laboratory, the majority have been typed as A(H3). During the week ending 02/07/2015, King County received one report of a laboratory-confirmed influenza A outbreak in a long-term care facility (LTCF) and one reported laboratory-confirmed influenza death; during the past five years, Public Health has received 7 - 24 reports of influenza deaths and 7 - 55 reports of outbreaks of influenza-like illness (ILI) in LTCFs. The proportion of emergency department visits attributable to influenza-like illness (ILI) decreased but remained elevated. During the week ending 02/07/2015, the University of Washington Virology laboratory saw elevated but declining numbers of specimens positive for influenza A and high levels of respiratory syncytial virus (RSV).

	Data for this week	Cumulative data this season since September 28, 2014
Laboratory-Confirmed Influenza Deaths	1	27
King County Outpatient Sentinel Influenza Providers		
Specimens Submitted	8	192
Proportion Positive for Influenza	12.5%	Season Peak: 56.3%
A (H1)	0	0
A (H3)	0	62
A (Unknown)	1	1
B	0	3
Hospital Laboratory Influenza Rapid Antigen Test Submissions		
Number of Labs Reporting	7	Weekly Average: 5
Number of Specimens Submitted	925	Weekly Average: 404
Proportion of Tests Positive for Influenza	16.8%	Season Peak: 32.7%
Hospital Emergency Department (ED) Visits for Influenza-like Illness (ILI)		
Proportion of Visits Due to ILI	2.9%	Season Peak: 5.5%
Percent of All King County Deaths Due to Pneumonia and Influenza (P & I)	7.4%	--
National Epidemic Threshold	7.2%	# Weeks Threshold Exceeded: 3
Respiratory Disease Outbreaks at Long-Term Care Facilities (LTCFs)	1	58
Laboratory-Confirmed LTCF Influenza Outbreaks	1	57

Note: 5 yr avg excludes the current season and the 2009 H1N1 pandemic period
